

## Endemic (native) species

An endemic or native species means that the plant or animal is from 

These are just 4 examples of endemic species from 

Coconut Crab

Sika Deer

Sea Turtle

Japanese Macaque

**Your Task!** Go online and search for 3 characteristics for each.

It could be a fact about their size, their habitat (where they live), what they eat, what eats them, or how they defend themselves in the wild.
